Professional Summary

Detail-oriented Automation Test Engineer with strong knowledge of Selenium WebDriver, Java, and TestNG for designing and executing automation test scripts. Skilled in building scalable automation frameworks using Page Object Model (POM) and Data-Driven Testing.

Hands-on experience in Agile methodology, SDLC, STLC, and defect life cycle. Proficient in functional, regression, and cross-browser testing. Strong analytical and problem-solving skills with a focus on delivering high-quality software solutions.

Technical Skills

Automation Testing

- Strong expertise in Selenium WebDriver with understanding of Selenium Architecture and WebDriver Architecture.
- Proficient in locator strategies: XPath, CSS Selectors, ID, Name, and Class.
- Experience handling dynamic elements, frames, windows, alerts, and synchronization using Implicit, Explicit, and Fluent Waits.
- Implemented Page Object Model (POM) for scalable and maintainable automation frameworks.
- Developed Data-Driven frameworks using Apache POI (Excel-based testing).
- Cross-browser testing across Chrome, Firefox, Edge, and Safari.
- Hands-on experience with TestNG (annotations, grouping, prioritization, reporting).
- Knowledge of Hybrid Framework (POM + Data-Driven).
- Familiar with BDD Cucumber (feature files and step definitions).
- API Testing using Postman.

Core Java

- Strong understanding of OOP concepts: Encapsulation, Inheritance, Polymorphism, and Abstraction.
- Exception Handling using try-catch, throws, throw, and custom exceptions.
- Knowledge of Collections Framework (List, Set, Map).
- Java I/O: File handling, reading/writing data, serialization.
- JVM basics: Memory management, Heap, Stack, and Garbage Collection.

Manual Testing

- Knowledge of SDLC and STLC.
- Experience in Functional, Regression, Smoke, System, and Ad-hoc Testing.
- Test case design, execution, and test scenario creation.
- Agile (Scrum) methodology: Sprint Planning, Daily Stand-ups, and Retrospectives.
- Defect tracking and reporting using JIRA with understanding of the Defect Life Cycle.

SQL

- Strong knowledge of DQL, DDL, and DML commands.
- Writing queries using SELECT, WHERE, ORDER BY, and DISTINCT.
- Joins: Inner Join, Left Join, and Right Join.

- Subqueries for complex data retrieval.
- GROUP BY and HAVING for aggregation and filtering.
- Aggregate functions: COUNT(), SUM(), AVG(), MIN(), and MAX().

Tools & Technologies

Selenium WebDriver | Java | TestNG | Hybrid Framework | Apache POI | BDD Cucumber | Postman
| API Testing | JIRA

Professional Experience

Junior Developer — Radiant System Service Pvt. Ltd.

January 2021 – July 2021

- Developed and enhanced desktop applications using C#.
- Fixed bugs and improved application performance.
- Collaborated with team members to implement new application features.
- Participated in debugging, testing, and maintenance activities to ensure software quality.

Projects

CRM Software Testing Project

QSpiders Institute, Noida

- Developed test plans and test cases based on business requirements.
- Performed Functional and Regression Testing.
- Reported defects and tracked the bug life cycle using JIRA.
- Prepared Requirement Traceability Matrix (RTM).
- Automated test cases using Selenium WebDriver with Java.

Strengths

- Strong problem-solving and debugging skills.
- Quick learner with a positive attitude.
- Good communication and teamwork skills.

Education

Bachelor of Technology (Computer Science Engineering)

Dumka Engineering College

CGPA: 7.77 / 10
